

How to Use Docket to Access Your or Your Family's MIIC Immunization Record

The free Docket mobile app lets you:

- View immunization records.
- See what vaccines you need to get.
- See what immunizations you have received, including recent immunizations.
- Show proof of vaccination.
- Share a PDF copy of your immunization record.

Three easy steps to access your immunization records with Docket

1. Set up your account.

- Download the free Docket app on your mobile device. Log in with email, Apple, or Google.

2. Search your immunization records.

- Select "Immunizations" from the main menu.
 - Anyone with a valid email or phone number on file in the Minnesota Immunization Information Connection (MIIC) can access their records. If you cannot locate your or your family's records using the Docket app, go to [Docket and MIIC Immunization Records \(www.health.state.mn.us/people/immunize/miic/docket.html\)](http://www.health.state.mn.us/people/immunize/miic/docket.html).
 - When several people are requesting records at the same time it could result in extra wait times. Refer to Docket's Twitter feed @dockethealthapp for up to date service announcements.

3. Stay healthy and up to date.

- **Simple vaccine verification:** Access Minnesota immunization records needed for school, work, travel, etc.
- **Add family members:** View your family's immunizations from a single Docket account.
